Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒      Form 40-F ☐

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ☐      No ☒

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): N/A

**Attached to the Registrant Form 6-K filing for the month of February 2010, incorporated by reference herein:**

**Exhibit**

- 99.1 Release dated February 11, 2010, entitled “REPORT TO SHAREHOLDERS FOR THE QUARTER AND SIX MONTHS ENDED 31 DECEMBER 2009”.

## **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

DRDGOLD LIMITED

Date: February 15, 2010

By: /s/ Themba Gwebu

Name: Themba Gwebu

Title: Company Secretary

## Report to shareholders for the quarter and six months ended 31 December 2009

(Incorporated in the Republic of South Africa) • Registration No.1895/000926/06 • JSE share code: DRD  
• ISIN: ZAE 000058723 Issuer code:DUSM • NASDAQ trading symbol:DROOY ("DRDGOLD" or "the company")

## GROUP RESULTS

### KEY FEATURES FOR THE QUARTER

- Gold production up 4%
- Cash operating unit cost in Rands down 8%
- Operating profit of R87.4 million
- DRDGOLD agrees to sell 60% of Blyvoor

## Forward looking statements

Many factors could cause the actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, adverse changes or uncertainties in general economic conditions in the markets we serve, a drop in the gold price, a sustained strengthening of the Rand against the Dollar, regulatory developments adverse to DRDGOLD or difficulties in maintaining necessary licenses or other governmental approvals, changes in DRDGOLD's competitive position, changes in business strategy, any major disruption in production at key facilities or adverse changes in foreign exchange rates and various other factors.

These risks include, without limitation, those described in the section entitled "Risk Factors" included in our annual report for the fiscal year ended 30 June 2009, which we filed with the United States Securities and Exchange Commission on 27 November 2009 on Form 20-F. You should not place undue reliance on these forward-looking statements, which speak only as of the date thereof. We do not undertake any obligation to publicly update or revise these forward-looking statements to reflect events or circumstances after the date of this report or to the occurrence of unanticipated events.

## Overview

Dear shareholder

### Safety, health and environment

Crown Gold Recoveries (Pty) Limited ("Crown") recorded a fatal accident during the quarter under review. Mr T.I Ndlangamandla, a fitter, was killed while performing routine maintenance at the Knights Plant. Blyvooruitzicht Gold Mining Company Limited ("Blyvoor") completed a full calendar year of operations without a fatality but shortly before the release of this report, on 3 February 2010, Mr R.M. Manhica died in a conveyance incident. We extend our deepest condolences to their families, colleagues and friends.

With respect to other safety parameters, Group performance was once again mixed, pointing to a need for continuing safety focus. Crown reported regressions in its Dressing Station Injury Frequency Rate ("DSIFR"), its Lost Time Injury Frequency Rate ("LTIFR") and its Reportable Injury Frequency Rate ("RIFR"). While Blyvoor's LTIFR and RIFR improved, its DSIFR deteriorated markedly. East Rand Proprietary Mines Limited ("ERPM") recorded no lost time injuries or reportable injuries, and its DSIFR improved by 82%.

At Blyvoor, intensive safety cross-audits by mine overseers are yielding good results and 'hot spot' visits by representatives of management and unions are continuing. Hazard assessment audits are a focus at Crown and ERPM. Work on the Group-wide behaviour-based safety initiative, briefly suspended during the Section 189A process at Blyvoor, has been resumed, and a number of mini safety campaigns are running concurrently across all of the operations.

All drilling machines have now been muffled and all fans silenced at Blyvoor. Installation of wet scrubbers at tips will begin on completion of the necessary research.

A total of R9.2 million was spent by the Group on environmental management and rehabilitation during the quarter.

### Production

Total gold production was 4% higher in the quarter at 59 866oz, reflecting continued production build-up at ErgoGold and higher production from Crown and the Blyvoor surface operation. Total surface gold production rose by 12% to 43 501oz, 73% of the quarter's total gold production, while underground gold production declined by 11% to 16 365oz.

### Financial

Total revenue for the quarter rose by 12% to R499.6 million, a consequence of improved gold production and a 12% increase in the average Rand gold price received to R268 302/kg. After accounting for total cash operating costs – 4% lower at R416.5 million, operating profit was R87.4 million compared with the previous quarter's R4.2 million loss. Net profit was R6.4 million compared with the previous quarter's net loss of R63.3 million.

### Blyvoor judicial management

We decided to place Blyvoor under judicial management, because of a combination of lower grades caused by seismic events knocking out a number of high grade panels and the effect of the lower gold price on Blyvoor's profitability. An improvement in yield and the R80 million facility set up by Aurora Empowerment Systems (Pty) Limited ("Aurora") (referred to below) may enable us to lift Blyvoor from judicial management.

## Detailed operational review

### Blyvoor

Surface gold production for the quarter rose by 15% to 8 681oz but underground gold production was 11% lower at 16 365oz, resulting in a 4% drop in total gold production to 25 046oz.

Lower underground production was a consequence both of a 6% drop in underground throughput to 137 000t and a 6% drop in underground average yield to 3.72g/t. Lower throughput reflects the continued impact of the wage strike and of the Section 189A restructuring process into October 2009. Yield continued to be lower as the underground operations still recover from the seismic damage incurred in June 2009.

Surface throughput was 13% lower at 702 000t, reflecting the continued impact of suspended uneconomic rock dump recovery, electrical storms in October and November causing disruption to slimes recovery and to suspension of the reef-picking project during the strike. The average surface yield, however, was 31% higher at 0.38g/t due mainly to increased recovery of higher-grade material from the lower portions of the slimes dams.

Total cash operating costs were 13% lower at R197.1 million and total cash operating unit costs 10% lower at R253 078/kg. This was mainly as a consequence of the lower summer-month power tariff applicable and of lower employment costs incurred following restructuring. While underground cash operating unit costs were only slightly lower at R344 990/kg, surface cash operating unit costs were 36% down at R79 807/kg. A cash operating profit of R12.6 million was recorded compared with the previous quarter's R34.8 million loss, a consequence of lower costs and a higher average Rand gold price received.

Capital expenditure was 30% lower at R17.5 million. This was due both to there being no opening up and development during the strike and to strict management of costs as part of the judicial management process.

Mining at the Way Ahead Project ("WAP") continued to average 1 400m<sup>2</sup> per month and is on track to reach the targeted 2 500m<sup>2</sup> per month by the end of the June 2010 quarter.

### Crown

Gold production rose by 2% to 19 451oz, a 5% increase in the average yield to 0.43g/t compensating for a 3% decline in throughput to 1 393 000t. The higher yield resulted from the continuing clean-up of various tailings footprints, while the lower throughput was mainly the consequence of necessary plant maintenance in the aftermath of the wage strike.

Total cash operating costs were 5% higher at R123.1 million and cash operating unit costs 3% higher at R203 519/kg. This was due mainly to the 8% wage increase effective from 1 October 2009. Cash operating profit was 23% higher at R38.6 million due to higher gold production and a higher Rand gold price received.

Capital expenditure was 32% lower at R3.4 million, reflecting completion of the latest cycle of tailings deposition site maintenance.

### ERPM

Gold production was 16% lower at 5 916oz due to a 21% decline in throughput, the effect of which was not offset by a 7% increase in the average yield to 0.48g/t resulting from the continued advance of the recovery process into the higher-grade northern part of the Cason Dump.

While total cash operating costs were 11% lower at R30.5 million, cash operating unit costs rose by 5% to R165 957/kg due mainly to lower gold production. Cash operating profit was 26% lower at R18.6 million, also due to lower gold production.

### ErgoGold

Gold production rose by more than 80% to 9 453oz, reflecting a 34% build up in throughput to 3 124 000t and a 29% improvement in the average yield to 0.09g/t.

Total cash operating costs rose by 20% to R65.6 million but cash operating unit costs were 33% lower at R223 224/kg, reflecting the increase in gold production. A cash operating profit of R13.3 million was recorded compared with the previous quarter's R10.6 million loss, a consequence of higher gold production, lower costs and a higher Rand gold price received.

Capital expenditure was 70% lower at R10.1 million as construction of Phase 1 infrastructure approaches completion.

The pilot plant constructed to help determine the optimal blend of material from the Elsburg Tailings Complex ("ETC") and the L29 dump performed well during the quarter. Analysis of the pilot plant's performance, together with additional flexibility resulting from additional booster pumps on the first ETC line and the commissioning of the second ETC line by the end of the March 2010 quarter, is expected to accelerate progress towards Phase 1's targeted steady state of 1.2Mt a month with a head grade of 0.32g/t. Improved yield should result as a consequence of an increase in volumes from Elsburg.

## Exploration and prospecting

### Blyvoor

Underground diamond drilling totalled 603.1m, with prospect holes drilled at 41-18, 33-m32, 38-21 and 15-56. Cover holes were drilled at 38-27, 38-21 and 41-18. The prospect hole at 33-m32 intersected Main Reef and assayed at 784cmg/t. The other prospect holes are ongoing. Reconnaissance visits were made to the Carbon Leader areas at No 5 Shaft. Normal stope face sampling and geological mapping is ongoing.

### Crown and Ergo

The Top Star boundary with Park Central township was drilled for the planning of the embankments and also to understand the extent of the slime that will form part of the embankments along the top road. All other drilling was directed at short- and medium-term grade control.

## Corporate activity

It has been a busy quarter in terms of corporate activity, our primary objectives being to ease Blyvoor's immediate financial stress and to strengthen our balance sheet so we can continue to advance our strategic shift towards recovery of gold from lower-risk, lower-cost, higher-margin surface retreatment and to contemplate cautious, well-considered growth when the time and opportunities are right.

As previously reported, we reached agreement with Aurora Empowerment Systems (Pty) Limited ("Aurora") for Aurora to acquire 60% of Blyvoor for R296 million, and to provide an R80 million loan facility to Blyvoor.

Agreement was also reached for Aurora to acquire the ERPM plant for R20 million. Aurora has paid R5 million toward the purchase consideration and will allow DRDGOLD to conduct a feasibility study on the extensive Grootvlei and Marievale tailings dams near Ergo, after which DRDGOLD may elect to either receive the balance of the purchase price in cash or establish a 10 year exclusive option to treat the aforementioned tailings dams.

Also, agreement was reached with Mintails for the DRDGOLD Group to acquire Mintails' 50% in Ergo Mining (Pty) Limited ("the Ergo Joint Venture") for R82 million, giving us full access to Ergo's Brakpan plant and thus capacity to double throughput for gold recovery, as well as full exposure to future uranium and sulphuric acid potential.

## Looking ahead

The Rand's strong trending continued during the quarter and is showing little sign of softening against the major currencies. For the near term, our focus will therefore remain much of the same - reducing our risk exposure, controlling costs and managing margins.

A primary focus will be Ergo: commissioning the second feeder line from ETC and continuing our push for steady state at the Brakpan plant; and now, with the acquisition of the balance of the Ergo Joint Venture, developing the synergies between Crown and Ergo. We will also continue to contribute towards stabilising Blyvoor's underground operation, while retaining an option on its attractive surface retreatment potential.

With an eye to future growth, we are looking to make an initial, modest investment to establish – in collaboration with a local partner – a prospecting project in Zimbabwe's considerable greenstone gold mining belt. We will keep shareholders informed of our first, cautious steps in this regard.

**Niël Pretorius**

*Chief Executive Officer*
